

Web Sites/Advertising

No matter which MLS system your listing is in, it will be in the following websites:

www.remax.com - RE/MAX corporate website. Displays all listings from all real estate companies.

www.homesincolorado.com - can search by MLS ID or by address. Usually takes a day or two after listing is in MLS for it to populate entirely in this site.

www.realtor.com - pulls all listings and populates under it's own constraints. We can't change anything in here. This will only have the main picture (1 picture). Click on more search options under Find a Home section. Scroll to the bottom, last field and enter MLS ID # then click show properties. Usually takes a day or two after listing is added/changed for it to populate correctly in this site.

www.chrisermold.com - this is my personal website.

If your listing is in IRES (Boulder Area) it will be in the following website in addition to the above:

www.coloproperties.com - only listings that are in Boulder MLS will come up here. This pulls directly from MLS. This will have all the pictures that are in the MLS. Can search by address or MLS ID #.

If your listing is in Denver MLS it will be in the following website in addition to the above:

www.recolorado.com - only Denver MLS listings will appear on this website. It pulls from the MLS. This will have all the pictures that are in the MLS. Can search by address or MLS ID #.
